  - 4. Technical
  - 5. Demo
  - 6. Q&A
-

# 1. INTRODUCTION

MEMBER:

- Lưu Nguyễn Đình Hiếu
  - Bùi Việt Ngữ
-

## 2. VISION OF SOLUTION

E-Invoice is built for the purpose of monthly invoice management in a family. It helps us to have an overall report of monthly expenses so that user could make plan to save money. User could set an alert for a limited amount of money consumed every month. Each invoice will have following information:

- Type of invoice: Electric, internet, telephone, water, ...
  - Amount of money.
  - VAT
  - Charged period (monthly).
  - Invoice No.
  - Customer code (optional).
-

## 2. VISION OF SOLUTION

### Major Features:

#### **Users:**

- Register account.
- CRUD services.
- CRUD invoice consumed by a service.
- View expenses report: Monthly, Yearly or a period of time

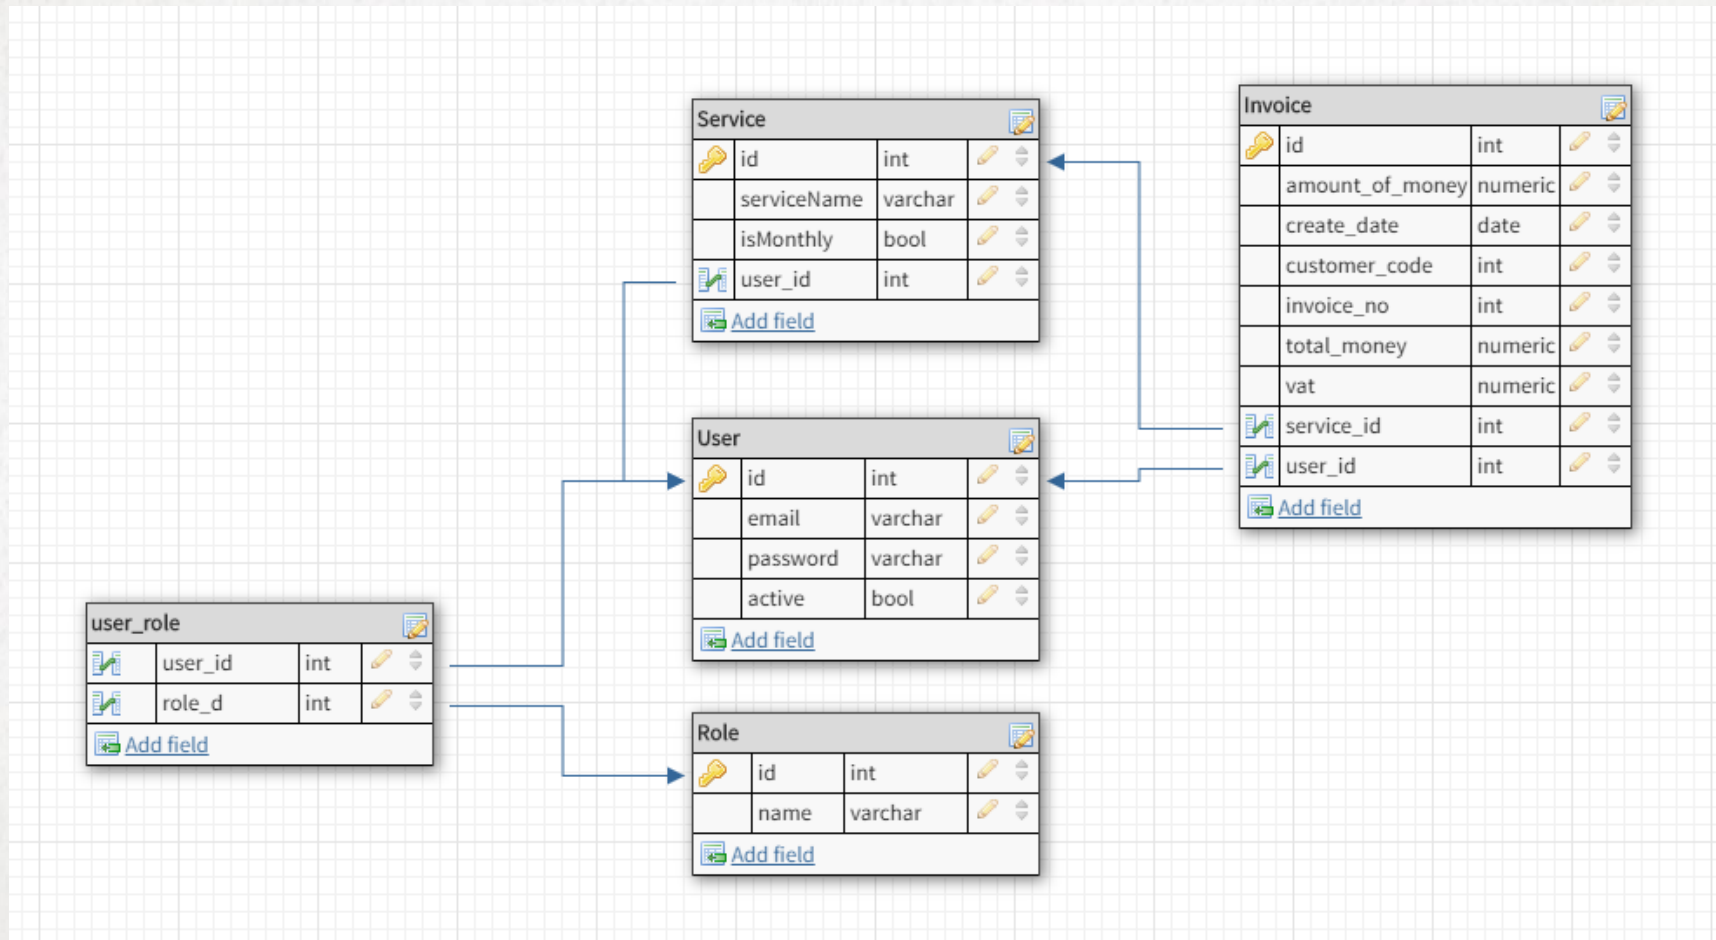

#### **Decentralization:**

- Login
- Logout
- User\_Registered

#### **Admin:**

- Activate/Deactivate a user account.

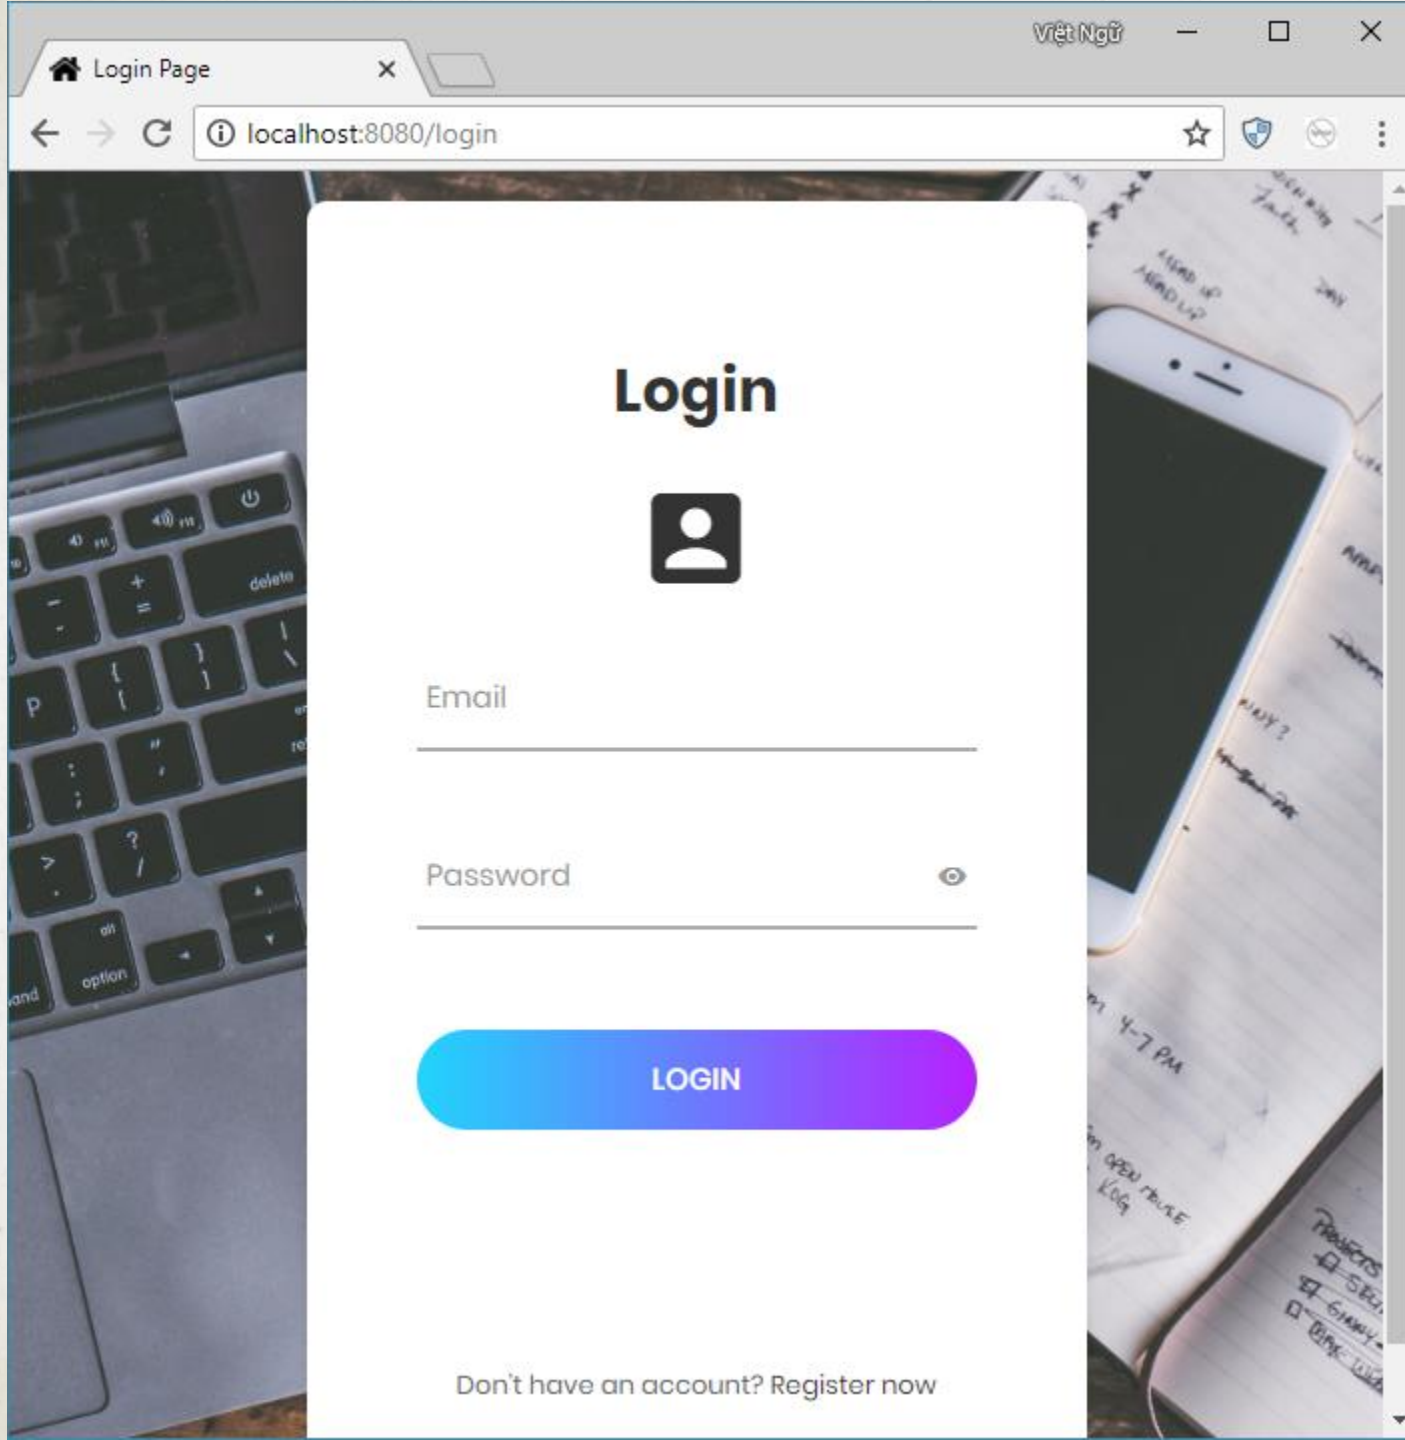

### 3. DATABASE DESIGN

## 4. TECHNICAL

- Framework: Spring Boot, Hibernate, and Spring Security
  - Client side: Bootstrap, HTML5, CSS3
  - Database system: MySQL
  - Source control: GitHub
-

## 5. DEMO

Q & A

---

**THANK YOU FOR LISTENNING !!!**
